Penn State University, Greater Allegheny

- STAT 200: Introductory Statistics (OpenStax) GAYDOS

This text follows scope and sequence requirements of a one-semester introduction to statistics course and is geared toward students majoring in fields other than math or engineering. The text assumes some knowledge of intermediate algebra and focuses on statistics application over theory. Introductory Statistics includes innovative practical applications that make the text relevant and accessible, as well as collaborative exercises, technology integration problems, and statistics labs.

- Front Matter
- 1: Sampling and Data
- 2: Descriptive Statistics
- 3: Probability Topics
- 4: Discrete Random Variables
- 5: Continuous Random Variables
- 6: The Normal Distribution
- 7: The Central Limit Theorem
